

Payroll and Time Management Software Solution

Accelerate Business Performance

PayrollOne

Managing and maintaining employee needs can be complex enough without having to worry about your payroll system. Supernova Consulting Ltd offers a software solution for all your payroll and time management needs.

PayrollOne is a fast, affordable and comprehensive solution based on the Cyprus legislation. And with its built-in capability for integration with Accounting/ERP systems, there is no need to re-key data or risk a decision based on inaccurate information. Our aim is to provide a dynamic payroll system that can help you minimize administration and help your staff work as effectively as possible.

PayrollOne is a robust and user-friendly system with a large Cyprus-wide base of satisfied customers.

Why PayrollOne from Supernova?

- A leading ERP & Business software company.
- Professional support through a fully staffed Help Desk.
- Continuous research & development to comply with changes in legal requirements and technological advancements.

Main Features

ADDITIONAL FEATURES

Web Timesheets

Employees can enter their time through the web and track project and activity time.

Project Payroll Allocation

Track and report salary and payroll expenses by customer, project and type of service.

Automatic Bank Payments

Save time and prevent errors by automatically generating files for electronic payments. PayrollOne supports electronic file formats of major local banks.

Accounting System Integration

Automatically transfer journal entries into well known SQL based Accounting/ ERP systems.

Provident Fund Integration

Automate provident fund accounting and handle provident fund procedures including contributions, loans, statements, etc.

Time-Clock Integration

Effortlessly import your employees' time and attendance data into payroll.

Export Facility

Data and forms can be easily exported to MS-Office applications.

REPORTING

Legal Reporting

Quickly calculate, print and post monthly Social Insurance, Income Tax reports as well as annual IR 7 and IR 63 reports.

Keep in electronic form all the details concerning employees' IR 59 and use them for automatic monthly tax deductions. Produce IR 7 and Social Insurance reports in either electronic or print media.

Management Reporting

PayrollOne offers over 140 reports with extensive parameters which give you the flexibility to answer almost any question in moments. Analyze your payroll costs, view employee lists, and monitor attendance and time spent. Prepare payment documents instantly and analyze jobs and projects worked on.

Save Time, Reduce Costs and Errors!

Quick payroll process to save you time. Once setup, the system can calculate and print pay slips instantly with the click of a button.

Flexible Pay Codes

Setup unlimited pay codes including salary, overtime, holiday, time off, sick time, and more. Maintain and manage employees to meet their particular needs. This makes the flexible to fit your unique payroll and time management processes.

Absence Tracking

Absence is tracked and allocated for payroll purposes and annual leave management.

Unlimited Benefits and Deductions

Unlimited benefit and deduction records, flexible calculation methods, and tax codes automate benefit and deduction tracking.

Quick and Flexible Payment Calculations

Calculate payroll for the whole company or pay and issue an individual slip any time during a payroll period.

Cancel/Void Payment

Can cancel and change payments easily for open pay periods.

Final Payment Calculation

Based on the last working day of an employee, the final payment is calculated with portion of 13th/14th salary and annual leave.

Income Tax Updates

Download and install - without any technical knowledge - all year-end and payroll tax updates, including changes to the IR 7, IR 63 and IR 59 reports 1099-R, as well as tax percentages data for the upcoming calendar year.

Role-based Access and Authorizations

Flexible authorization options allow users with different roles to have access only to the actions their role permits (i.e. timesheets only).

Language

Dual Language System - select Greek or English. Produce payslips either in Greek or English depending on the employee preferences.

Multi-Currency Capabilities

Process payroll for employees in different currencies.

Maintenance

Internet based maintenance. No need for costly in-house visits by support staff. Software updates and new versions can be downloaded and ready to run within minutes.
